

Suggested Landscape Maintenance Service Agreement Modification

Scheduled Fertilizer Applications

Contractor will install custom mixed, non staining granular and low phosphorus fertilizers to turf, plants, palms and trees four times per year in February, March, October and December using **Best Management Practice (BMP)** rates and recommendations published by the **University Of Florida Institute Of Food And Agricultural Sciences** for healthy growth and protection of surface water resources.

During the course of any fertilizer application the contractor shall have appropriate on-site supervision by a senior principal or management employee to establish "fertilizer free" zones within 10 feet of any lake, pond, preserve or wetland area.
